

EZZ ABDELMOEZ AHMED MOHAMED

Backend Developer (.NET)

Egypt | +20 101 408 0630 | ezzabdelmoez@gmail.com | [linkedin.com/in/ezz-abdelmoez](https://www.linkedin.com/in/ezz-abdelmoez) | github.com/ezz-abdelmoez | <https://v0-ezz-abdelmoez.vercel.app/backend-engineer>

PROFESSIONAL SUMMARY

Backend Developer specializing in designing, developing, and maintaining scalable, secure, and high-performance backend systems using C#, ASP.NET Core, Entity Framework Core, and SQL Server. Experienced in building RESTful APIs, authentication and authorization systems, and database-driven enterprise applications following Clean Architecture, SOLID principles, and proven design patterns. Strong understanding of software architecture, database design, API security, and performance optimization across the complete software development lifecycle. Passionate about writing clean, maintainable code and delivering reliable backend solutions that support business growth.

CORE TECHNICAL SKILLS

Languages: C#, SQL, JavaScript (Basic)

Backend Technologies: ASP.NET Core, ASP.NET Web API, ASP.NET MVC, .NET 6, .NET 8

API Development: RESTful APIs, API Versioning, Swagger / OpenAPI, Postman, API Documentation

Database: SQL Server, Entity Framework Core, LINQ, Database Design, Query Optimization, Stored Procedures

Authentication & Security: JWT Authentication, Role-Based Access Control (RBAC), Authorization, Identity Management, API Security

Architecture & Engineering: Clean Architecture, SOLID Principles, Design Patterns, Dependency Injection, Repository Pattern, Unit of Work Pattern, Layered Architecture

Tools & DevOps: Git, GitHub, Azure DevOps, Visual Studio, CI/CD Fundamentals

Practices: OOP, Agile, Scrum, Debugging, Testing, Refactoring, Performance Optimization

PROFESSIONAL EXPERIENCE

Backend Developer / Full Stack Developer | Luxor Booking Tours *Oct 2025 – Jun 2026*

- Designed and developed scalable RESTful APIs using ASP.NET Core, following Clean Architecture and SOLID principles.
- Built and optimized SQL Server databases and queries to improve backend performance and reliability.
- Implemented JWT-based authentication and role-based authorization systems to secure application endpoints.
- Developed core business logic and backend services, integrating frontend applications with backend APIs.
- Participated in code reviews, debugging, testing, and deployment activities across the development lifecycle.
- Improved application performance, maintainability, and security through ongoing refactoring and optimization.

IT Support Intern | Agricultural Bank of Egypt *Oct 2023*

- Supported enterprise systems and software infrastructure, performing troubleshooting and system maintenance.
- Assisted with software deployment and updates, ensuring system reliability and operational continuity.

KEY PROJECTS

Hospital Management System — ASP.NET Core Web API, Entity Framework Core, SQL Server, JWT Authentication

- Developed scalable backend APIs for healthcare management, implementing role-based access control (RBAC).
- Designed secure authentication and authorization workflows to manage patient records, appointments, and audit logging.

Farhetak — Wedding Hall Booking Platform — ASP.NET Core Web API, Entity Framework Core, SQL Server

- Developed reservation and booking backend services, designing relational database structures and scalable RESTful APIs.

Tour Booking Platform — ASP.NET Core, SQL Server, Entity Framework Core

- Developed booking and availability management APIs, designing backend workflows to improve performance and maintainability.

EDUCATION

Bachelor of Computer Science | Luxor University *2019 – 2023*

Information Technology Institute (ITI) — .NET Full Stack Web Development Track *2025*

CERTIFICATIONS & LANGUAGES

Certification: Cisco CCNA v7

Languages: Arabic (Native), English (Very Good)
